

**Project Name: Online Storage**

**Test Case**

**Test Case ID:** Tc#6

**Test Designed by:** Ahmad Raza

**Test Priority:** High

**Test Designed date:** 11/12/2019

**Module Name:** User Panel

**Test Executed by:** Faisal Shahzad

**Test Title:** Upload File

**Test Execution date:** 11/12/2019

**Description:** Application support uploading files, user should be able to upload files of any kind.

**Pre-conditions:** User has been logged in and User Panel is opened

**Dependencies:** Tc#5

| Step | Test Steps                                               | Test Data    | Expected Result                                     | Actual Result                                       | Status (Pass/Fail) | Notes |
|------|----------------------------------------------------------|--------------|-----------------------------------------------------|-----------------------------------------------------|--------------------|-------|
| 1    | Open 'Document' directory                                |              | Directory Opened and current location is /documents | Directory Opened and current location is /documents | PASS               |       |
| 2    | Click 'Upload Files' button                              |              | 'Upload Files' top window should be opened          | 'Upload Files' top window opened                    | PASS               |       |
| 3    | Use File input field to select file                      | Any document | File is selected in input field                     | File is selected in input field                     | PASS               |       |
| 4    | Click 'Add File'                                         |              | Selected file appear in selected files              | Selected file appear in selected files              | PASS               |       |
| 5    | Use File Input Field to select another file              | Any document | File is selected in input field                     | File is selected in input field                     | PASS               |       |
| 6    | Use 'File Name' input field to input a new name for file | Any new name | Ok                                                  | OK                                                  | PASS               |       |
| 6    | Click 'Add File'                                         |              | Selected file appear in selected file with new name | Selected file appeared                              | PASS               |       |
| 7    | Click 'Upload Selected' to upload selected files         |              | Files are uploaded and appear in current directory  | Files are uploaded and appear in current directory  | PASS               |       |
| 8    | Use 'Back' button to go back to previous directory       |              | Current location is changed back to /               | Current location is changed back to /               | PASS               |       |

|   |                                                               |  |                               |                               |      |                                                                                      |
|---|---------------------------------------------------------------|--|-------------------------------|-------------------------------|------|--------------------------------------------------------------------------------------|
| 9 | Repeat Step 1 to 7 to upload two videos to 'videos' directory |  | Videos uploaded successfully. | Videos uploaded successfully. | PASS | This time select an extra file and try to remove its selection from 'Selected Files' |
|---|---------------------------------------------------------------|--|-------------------------------|-------------------------------|------|--------------------------------------------------------------------------------------|

**Expected Result:**

- Uploaded files appear in 'documents' and 'videos' directories.
